

JRF

GEL TECHNOLOGY

Advanced Oral Delivery Solutions

JRF Technology's gel systems offer next-generation, **extended-release** oral delivery solutions. Designed to fit comfortably on the **tongue, cheek, or gum line**, our gels hold 500–600 mg of active ingredients, providing more capacity than traditional oral films.

Key Features

- **High Active Ingredient Capacity:** Each gel contains up to **600 mg** of active ingredients.
- **Customizable Shape and Thickness:** Gels are tailored to fit comfortably and precisely in the oral cavity for targeted delivery.
- **Flexible Release Options:** Customizable **sustained, extended, or continuous release** times ranging from **10–15 minutes** to **several hours**, allowing for controlled, long-lasting effects.

Applications

JRF's gel technology delivers **sustained, extended, or continuous release**, of active ingredients across a range of wellness and health products including:

- **Energy:** For boosting alertness and stamina.
- **Focus:** Enhancing cognitive function and concentration.
- **Immunity:** Supporting the body's immune defenses.
- **Sleep:** Promoting relaxation and better sleep quality.
- **Oral Health:** Addressing dry mouth, cough & cold relief, and other oral care needs.

Packaging Each gel is individually sealed in **peelable** or **tear-open pouches**, ensuring product integrity and easy, on-the-go use.

XeroStrips, a commercial product utilizing JRF Technology's gel system, delivers active ingredients to address dry mouth, demonstrating the practical, market-ready capabilities
